

We, as organizers of the Ice Hockey World Championship 2017 in Paris, confirm that ColosseoEAS provided its Video Goal Judge solution at AccorHotels Arena in Paris.

The system performed flawlessly during the whole Championship and with its help the IIHF referees solved disputable moments that occurred during the tournament games.

IIHF referees appreciated the user-friendly interface, precise advanced video analytical options and ease of control.

Colosseo also ensured express installation with successful integration of goal cameras and provided professional training for our operating staff.

We fully recommend Colosseo Video Goal Judge as a proven and reliable system that IIHF has been using since the Ice Hockey World Championship in 2011 in Slovakia as it has completely fulfilled our requirements and expectations.
